

# Providing deep insight into your customers' next generation cloud-based infrastructure

Cloud-based application deployment has dramatically increased the complexity of managing an organization's IT infrastructure. Datadog ([www.datadoghq.com](http://www.datadoghq.com)) understands your customers' modern infrastructure stacks and provides powerful monitoring, visualization,

and alerting. Leveraging Datadog enables you to provide deep insight into your customers' cloud, on-premise, or hybrid infrastructures, managing them more efficiently and proactively than ever before.

**MONITOR YOUR CUSTOMERS' CLOUD, ON-PREMISE, AND HYBRID INFRASTRUCTURES IN ONE PLACE**

Visualize the health of your customers' infrastructures with at-a-glance host maps and customizable dashboards

Generate alerts across all infrastructure metrics, host status, and events

Ensure successful on-premise to cloud migration by simultaneously monitoring both cloud and on-premise infrastructures

**SERVE MORE CUSTOMERS EFFICIENTLY WITH MONITORING AUTOMATION**

Utilize tightly integrated configuration management tools and Datadog's robust API to automate Datadog's collection, visualization, and alerting capabilities

Automatically identify behavior abnormalities with outlier and anomaly detection

Use powerful and customizable tags to automatically group devices and services within your customers' dynamic infrastructures

**QUICKLY AND PROACTIVELY RESOLVE YOUR CUSTOMERS' CRITICAL ISSUES AND MEET SLA'S**

Set up sophisticated alerting on metrics, events, data, and uptime from any system that Datadog is monitoring

Correlate performance metrics with events from other IT systems, tools, and services to assess whether a change in one system affected another

Access high-resolution data retention for troubleshooting and analysis

**START PROVIDING VALUE TO YOUR CUSTOMERS IN MINUTES**

Create high-resolution, interactive graphs and dashboards in seconds for your customers' infrastructures so you can see everything all in one place

Share performance information and updates with customers and other stakeholders through highly customizable, read-only dashboards

Auto-create templated dashboards via API when a new customer is onboarded

## Partner Program Benefits

Datadog is committed to the success and growth of our partners' businesses. In addition to great technology, we provide critical tools and resources towards that end:

Technical and sales onboarding to enable partner teams to successfully sell and manage Datadog

Marketing resources including joint demand generation and content creation, email templates, rebrandable collateral, and more

Dedicated Partner Success Team focused on partner success and growth
