

Fill the monitoring gap in your customers' cloud-based stacks with powerful dashboarding and alerting

Cloud deployment has dramatically increased the complexity and data generated by IT infrastructures. Without a monitoring solution that can instrument all of the systems in a customer's stack, scale alongside environment growth, and keep track of the frequent changes in a cloud platform, cloud-based infrastructure

can become time-consuming and challenging to implement and manage.

Datadog (www.datadoghq.com) completes your customers' modern cloud infrastructure stacks by providing powerful monitoring, visualization, and alerting into dynamic cloud environments.

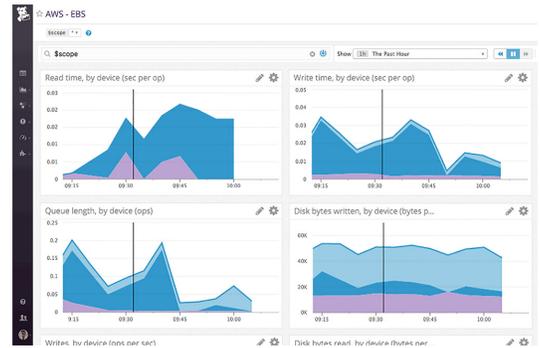

ROBUST ALERTING CAPABILITIES TO REMOVE THE NOISE AND CREATE TRULY ACTIONABLE ALERTS

Create sophisticated alerts on metrics from any system

Alert on services or individual hosts through metric aggregation and tagging

Streamline issue resolution by appending internal documentation or best practices for investigations

Receive alert notifications via email, through chat platforms like Slack, HipChat, and Campfire or third-party alert aggregators such as PagerDuty, and VictorOps

REDUCE MEAN TIME TO RESOLUTION (MMT) FOR PERFORMANCE ISSUES

Root-cause analysis through search and correlation of metrics and events

Assess how changes affect other systems by correlating metrics and events across disparate IT systems and components

Zero-in on the right code changes, relevant config updates or scheduled jobs

INFRASTRUCTURE-WIDE VISIBILITY INTO THE "BLACK BOX" OF DYNAMIC, CLOUD INFRASTRUCTURE

With over 120 turn-key integrations, including AWS, Azure, and OpenStack, Datadog seamlessly aggregates metrics and events across the full devops stack

Create real-time, highly-customizable graphs and dashboards of metrics quickly and easily with drag and drop widgets

Share dashboards for more effective collaboration

Partner Program Benefits

Datadog is committed to the success and growth of our partners' businesses. In addition to great technology, we provide critical tools and resources towards that end:

Technical and sales onboarding to enable partner teams to successfully sell and manage Datadog

Marketing resources including joint demand generation and content creation, email templates, rebrandable collateral, and more

Dedicated Partner Success Team focused on partner success and growth

Become a Datadog Partner at:
