

Executive Biographies

Olivier Pomel

CEO & CO-FOUNDER

Prior to founding Datadog, Olivier Pomel built data systems for K-12 teachers as a VP, Technology for Wireless Generation, growing the development team from a handful to close to 100 of the best engineers in NYC until the company's acquisition by News Corp. Before Wireless Generation, Olivier held software engineering positions at IBM Research and several internet startups. Olivier is an original author of the VLC media player and holds a MS, CS from the Ecole Centrale Paris.

Alexis Lê-Quốc

CTO & CO-FOUNDER

Alexis brings a strong focus on technical elegance and operational efficiency to Datadog. Prior to founding Datadog, Alexis Lê-Quốc served as the Director of Operations for Wireless Generation where he built the team and infrastructure that served more than 4 million students in 49 states. As a member of the original "devops" movement, Alexis spent several years as a software engineer at IBM Research, Neomeo and Orange. Alexis holds an MS, CS from the Ecole Centrale Paris and has presented sessions on cloud monitoring and server performance at conferences including AWS re:Invent, Monitorama, DevOpsDays, Velocity, and PyCon.

Amit Agarwal

CHIEF PRODUCT OFFICER

Throughout his 15 years of experience in enterprise software, Amit has worked in various business strategy and technical management roles to bring new products to market. Before Datadog, Amit was the Director of Product Management at Quest Software, where he led the team responsible for application performance monitoring. Previously, Amit held product management roles at enterprise software firms including Datamirror (now IBM) and Embarcadero Technologies, and technical roles with 3D-medical imaging and mobile encryption software companies. Amit holds an MBA from the Schulich School of Business and a Masters in Computer Science from Dalhousie University.
